Human Resource Management (HRM) System

Project Documentation

Version: 1.0
Document Type: Project Overview & System Documentation
Prepared By: HRM Development Team
Date: February 2026
Confidentiality Level: Internal Use Only

1. Executive Overview

The Human Resource Management (HRM) System is a centralized digital platform designed to streamline HR operations, improve workforce visibility, and enhance internal communication within the organization.
The solution enables **HR teams, Team Leads, and Employees** to efficiently manage daily activities such as attendance tracking, leave management, payroll processing, performance reviews, and internal communication — all within a single secure system.

---

2. Project Objectives

Digitize and centralize HR operations
Improve transparency in employee activity tracking
Reduce manual HR administrative workload
Enable faster payroll and leave processing
Enhance internal communication and collaboration
Provide real-time workforce insights for management

---

3. Project Development Phases

Phase 1 – UI/UX Design & Approval

Complete workflow and interface design created in Figma
Stakeholder reviews conducted
Final design approved before development

Phase 2 – Application Development

Frontend: Developed using Flutter for a responsive and scalable interface
Backend: Built with Node.js for secure and efficient server-side operations
Database: MongoDB used for structured and scalable data storage

Deployment Architecture

Frontend hosted on Netlify
Backend deployed on Render
Secure cloud-based infrastructure ensuring reliability and performance

---

4. Current Operational Status

Successfully implemented across the organization.

Actively used by 40+ employees for over three months.

Fully functional attendance, payroll, leave, and internal communication modules
Stable cloud deployment with continuous monitoring

---

5. Core Features

A. Attendance & Workforce Tracking

Secure employee login system
Daily login, break, and logout tracking
Real-time attendance monitoring
Instant attendance reporting for HR

B. Leave Management System

Online leave application submission
Multi-level approval workflow (TL / HR)
Leave history tracking
Quick access to employee leave data

C. Payroll Management

Monthly and yearly payslip generation
Salary breakdown (Earnings, Deductions, Net Pay)
Downloadable payslip access
Centralized payroll data management

D. Internal Communication Module(Mail)

Built-in internal mail system
Secure employee-to-employee communication
Centralized message management within the portal

E. Performance Review System

Performance review submission by TL and HR
Structured employee evaluation tracking
Digital performance record maintenance

6. Security & Scalability

Secure authentication and access control
Role-based access (Employee, TL, HR, Admin)
Scalable cloud infrastructure
Structured database management for future expansion

7. Upcoming Enhancements (Under Production)

A. Integrated Audio & Video Calling

One-to-one audio calls(With screen sharing and Recording)
One-to-one video calls(With screen sharing and Recording)
Group calls for team collaboration(With screen sharing and Recording)

B. Real-Time Messaging in Employee Directory

Direct individual and Group messaging
Internal chat functionality
Improved real-time communication

8. Business Impact & Value

Significant reduction in manual HR processes
Faster decision-making through real-time reporting
Improved workforce visibility
Enhanced employee engagement
Secure and centralized HR ecosystem
Scalable architecture for future organizational growth

Employee Dashboard

1. Apply Leave

Enables employees to submit leave requests directly from the dashboard with minimal navigation.
Streamlines approval workflows and ensures real-time leave balance tracking.

2. Download Payslip

Provides secure, one-click access to monthly salary slips.
Enhances transparency and reduces dependency on HR for payroll documentation.

3. Mark Attendance

Allows employees to record daily attendance in real time.
Ensures accurate time tracking and supports payroll and compliance processes.

4. Mail

Offers direct access to internal HR or company communication channels.
Facilitates seamless communication between employees and management.

5. Notifications Preview

Displays real-time updates, reviews, messages and holidays details.
Keeps employees informed about message, reviews, and new holiday updates.

6. Company Events

Provides visibility into upcoming corporate events and activities.
Encourages employee engagement and organizational participation.

Team Lead (TL) Dashboard
The TL Dashboard provides a centralized view for managing team activities, monitoring employee performance, and handling leave requests efficiently. It enables Team Leads to make informed decisions and ensure smooth workflow within the team.

Leave Approval Management
Team Leads are responsible for reviewing and approving leave requests submitted by team members based on team availability and organizational requirements.

Types of Leave Available: Sick Leave, Casual Leave, SAD Leave
Key Responsibilities:
Review leave requests submitted by employees.
Check leave balance and availability before approval.
Evaluate team workload and project commitments.
Approve or reject leave requests accordingly.

Provide comments or reasons in case of rejection.
Ensure proper team coverage to avoid workflow disruption.

Performance Review

Team Leads conduct monthly performance evaluations for their team members based on individual contributions and overall performance.
Key Features:
Submit structured monthly performance reviews.
Assess productivity, quality of work, and adherence to deadlines.
Provide constructive feedback and improvement suggestions.
Highlight achievements and recognize outstanding performance.
Track progress and growth over time.

HR Dashboard :

Employee Feedback – Employee performance reviews are sent by the TL. If employees have any issues or comments, they can report them. These reports are visible only on the HR dashboard, where HR can review them.

Requests – If a TL or an employee needs to change or update anything in their profile, the request will be visible to HR. HR can approve or reject the request.

Company Events – Using this functionality, HR can add organization events. These will be visible in the company events section and as an event banner for all employees.

Add Employee – HR can add new employees, and the information will be updated across all related modules.

Employee List – HR can view employee status, including login and logout times. HR can also edit and delete employee records.

Attendance List – HR can view attendance for all employees month-wise and summary-wise, and can also download it as an Excel file for easy tracking.

Holiday Master – HR can add, update, and delete holiday entries. These updates will be reflected in notifications, event banners, and the attendance list so employees can be aware of holiday dates.

Recruitment – This section includes campus invites, on-campus and off-campus recruitment, offer letter generation, revised letter generation, HR policy, and exit forms. HR can access and track all related information here.

Performance Review – HR can send performance reviews for TLs, and HR performance should be reviewed by the Founder.

Apply Leave – If HR applies for leave, only the Founder can approve it.

Leave Approval – HR can view all leave requests domain-wise and can approve leave for both TLs and employees.

Leave management:

The Leave Status page of an Employee HRM system, where employees can view their leave applications along with dates, reasons and approval status. It also provides actions to edit or delete leave requests, and displays statuses like Pending and Approved.

The Leave Status page also includes a Cancel History section, which displays the history of all cancelled leave requests.

Every dashboard (Founder, HR, TL and Employee) having the Leave summary, the Leave Summary displaying different leave types (Casual, Sick and Sad Leave) with used and remaining leave counts, along with a View button to check details for each category.

To DO list:

Every dashboard (Founder, HR, TL and Employee) having To-Do list. In that shows a time and date widget on the dashboard, displaying the current time, today's date, and a shortcut button to access the To-Do List for task management.

To-Do list is a task management feature in an Employee HRM system, where users can select a date, add multiple tasks, set work status (WFH/WFO), enter task details, ETA, and status, and manage daily work updates efficiently.

Mail Module

(Common for all dashboards – Employee, Intern, Tech Trainee, HR, TL, Founder)

The Mail module is accessible to all roles within the organization and includes the following features:

- **Inbox** – View received emails
- **Sent** – Access sent messages
- **Drafts** – View saved drafts
- **Compose** – Create and send new emails
- **Trash** – Manage deleted emails
- **Search Bar** – Quickly find specific emails
- **Refresh Option** – Update mailbox instantly

Notification Module

(Common for all roles – Employee, Intern, Tech Trainee, HR, TL, Founder)

The Notification module keeps users informed about important updates and communications.

- Employees receive notifications and messages from other employees and Team Leads.
- TLs receive:
    - Monthly performance reviews from HR or the Founder
    - Notifications of performance reviews they send to their team members
- HR receives:
    - Monthly performance reviews from the Founder
    - Notifications of reviews they send to TLs
- Founder receives:
    - Notifications of performance reviews sent to TLs and HR

Additional Feature:

- Holiday list with **Year and Month filter** for easy reference

---

Performance Review Module

(Accessible only to TL, HR, and Founder)

The Performance Review system allows structured evaluation using a **three-flag rating system (Red, Yellow, Green)** based on the following parameters:

- Communication
- Attitude
- Technical Knowledge
- Business Understanding

Role-Based Permissions:

- **TL** can submit performance reviews for their team members.
- **HR** can submit performance reviews for TLs.
- **Founder** can submit performance reviews for HR.

Feedback System:

- Employees and TLs can provide feedback regarding their performance reviews directly to the Founder

Mark Attendance Module

1.Login:

Employees are permitted to log in directly if their login time falls between 08:55 AM and 09:05 AM.

If an employee logs in outside the permitted time the system will require a valid reason which will be recorded with the login entry.

2.Logout:

Employees are permitted to log out directly if their logout time falls within the approved logout time window.

If an employee logs out outside the permitted time the system will require a valid reason which will be recorded with the logout entry.

3.Break:

Employees may take multiple breaks during the workday.However the total cumulative break duration is limited to 60 minutes per day.

4.Attendance History Maintenance:

The Attendance Module records the last five working days in a table, including Date, Status, Login, Logout, and Break Duration for quick reference and reporting.

Recruitment Module – Campus Drive Management

The Campus Drive Management feature enables structured handling of both **On-Campus** and **Off-Campus** recruitment drives through a unified HR dashboard.

HR can create drives by selecting the drive type (On/Off Campus), entering institution or venue details, and maintaining candidate records. For on/off campus drives, college details and eligible student lists are managed centrally. Selected candidates can be finalized through a checklist-based selection process, enabling **bulk generation of offer letters** for operational efficiency.

This module ensures organized drive tracking, streamlined selection workflows, and automated documentation, improving recruitment transparency and turnaround time.

Onboarding – Offer Letter Management

Offer Letter Generation:

- HR or Founder can generate a **single/bulk offer letter** manually.

- HR or Founder can also **import data from Excel** to generate bulk offer letters (up to 100 at a time).
- The system automatically generates a unique **Employee ID** for each candidate.
- Every section of the offer letter is editable, including:
    - Position
    - Salary
    - Joining Date
    - Salary Effective From Date
    - Sign-Before Date

View Offer Letter Module

- HR can track and monitor:
    - Total count of offer letters
    - Offer letter generated date
    - Candidate name
    - Position
    - Employee ID
    - Salary details
- Additional features:
    - Download option (PDF format)
    - Direct **Gmail** sharing option with predefined email content
    - Year-wise and Month-wise filters for easy tracking and reporting

Revised Offer Letter Management

Revised Offer Letter Generation:

- HR or Founder can generate a **Revised Offer Letter** for existing employees.
- The system allows updates from previous to new details, including:
    - Previous Position → New Position
    - Updated Salary

    - Updated CTC
    - Joining Date
    - Salary Effective From Date
    - Sign Date
- An **editable template option** is available to customize the revised offer letter format as required.

View Revised Offer Letter Module

- HR can monitor and track:
    - Total count of revised offer letters
    - Generated date
    - Employee name
    - Previous position and revised position
    - Employee ID
    - New salary details
    - Joining date
    - Salary effective date
- Additional features:
    - Year-wise and month-wise filters
    - Search functionality
    - Download option
    - Edit option
    - Delete option
    - Preview option

The **HR Policy** is available in the HRM portal, where users can easily view and download it.

EXIT:

Exit Details – HR can fill in the exit details for employees, and the list of exited employees can be viewed

here.

Exit Form – The exit form for our organization is available here by default. HR can download it and share it with corresponding employee.

Experience Certificate – HR can create experience certificates for employees, and HR can view and download them.

Conclusion

The HRM system represents a strategic step toward digital transformation within the organization. It enhances operational efficiency, improves communication, and provides a scalable foundation for future HR innovations.
